Innovative displays of comparative positions on multiple criteria

Point-and-click access to in-depth information

Check-and-refine approach with iterative narrowing-down search process

User libraries

Custom factors Screenings Ranking analyses

- Sismo is a SaaS platform, designed with the objective to bring at a glance to the investors' eyes the dynamics of stocks on standard and proprietary financial indicators, with zero compromise on data accuracy.
- Accessing appropriate comparative information is the first step in investment decision. From there on, we developed a seamless point-and-click user experience to dig into historical and prospective data, save and compare analyses with multiple iterations, define and back-test multi-factor strategies.
- Sismo offers insightful factor analysis and "quantamental" approach to fundamental equity investors. Our clients use Sismo to check their factor biases and adjust their holdings, with marginal optimization features based on their criteria. The Rank analysis provides a unique tool for advanced market screenings.

With Sismo, we bring to the investment community an intuitive, versatile and scalable analytical solution, for improved investment strategies, in a highly competitive and cost-constraint environment.
